

I can collect data and present it in a pie chart.

Item	Tally	Total	degree
Monopoly		5	150°
Connect 4		3	90°
Twister		3	90°
Kerplank		1	30°

1 person = 30°

★ Good work creating a pie chart.

☞ Why did you need to find $\frac{1}{12}$ of 360?

You need to find what 1 person would be as a degree
